

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PRINTED BY JOHN WILSON AND SON,  
22, SCHOOL STREET.

TO

PROFESSOR CHARLES C. JEWETT,

LIBRARIAN OF THE SMITHSONIAN INSTITUTION,

WHOSE SERVICES IN BEHALF OF LIBRARIES AND BIBLIOGRAPHY IN THE UNITED STATES

HAVE WON FOR HIM THE ESTEEM OF ALL AMERICAN SCHOLARS,

*This Work is respectfully dedicated,*

AS A TRIBUTE OF PERSONAL REGARD, AND A GRATEFUL ACKNOWLEDGMENT OF

EARLY SUGGESTIONS WHICH LED TO ITS

PUBLICATION.

## P R E F A C E .

---

SINCE the establishment of the Edinburgh Review in 1802, periodical publications have been gradually advancing in merit, until, for ability and influence, they have come in our day to stand in the front rank of modern literature. There is scarcely any subject in philosophy or criticism, the sciences or the arts, politics or religion, that has not been discussed in them by the first writers of the age. A list of contributors to the principal periodicals of Great Britain would comprise almost every name of literary eminence in the kingdom; and the same remark is equally true of our own country. In the investigation of a subject, an able article in a review is often more useful to the student than a professed treatise, as it contains concise and abbreviated information, and frequently the history, if not the essence, of all that had been previously written upon it. Periodicals form a considerable portion of every public and private library; but their contents are not available, for the want of a clue to the labyrinth of topics dispersed through the leaves of many hundred volumes.

Some five years since, while connected with the library of the "Society of Brothers in Unity" in Yale College, I attempted to execute a plan by which the contents of the periodicals could be made accessible to the students of that institution, in the preparation of their written exercises, and the discussions of their literary societies. Employing such moments of leisure as could be saved from my college studies, I arranged, under topics which were supposed to be of interest to that community, references to the periodicals in which they were treated. Though not originally designed for publication, the manuscript was after-

wards printed under the title of "Index to Subjects treated in the Reviews, and other Periodicals, to which no Indexes have been published," New York, 1848; 8vo, pp. 154. Referring only to such periodicals as were found in the Society's well-selected library of ten thousand volumes, its deficiencies were necessarily great when applied to other and larger collections. The edition was chiefly taken up by other colleges and public institutions, and for several years the work has been out of print. The favor with which it was received, together with the solicitations of many librarians and bibliographers, has induced me to attempt the preparation of a more extensive Index upon the same general plan; and the result of my labors is herewith submitted to the public.

This volume will be found to contain my former Index, and more than six times as much matter in addition. The list of periodicals has been largely increased; portions of series before excluded, for the reason that their Indexes had been previously published, have now been included; and the whole has been brought down to January, 1852.

An attempt has been made to ascertain, as far as possible, the authorship of anonymous articles; and, when the evidence of authenticity has been deemed sufficient, the name of the writer has been given within parentheses. The undertaking, from its obvious difficulties, has been but partially successful. The list of writers in the *North American Review* is complete, with four or five exceptions. That of the *Christian Examiner* is nearly complete; and a greater or less number of writers, in every series included in the work, are given. To Mr. GEORGE LIVERMORE, of Cambridge, and Mr. WILLIAM H. WELLS, of Newburyport, I am under obligations for valuable aid in making up so complete a list of the writers in the *North American*. The articles of Jeffrey, Southey, Macaulay, Carlyle, Alison, Wilson, Talfourd, Stephen, Mackintosh, Scott, Thompson, Sterling, De Quincey, Rogers, Greg, and other prominent English reviewers, have been identified by means of their biographies and published miscellanies. Further information with regard to authors will be thankfully received; and it is to be hoped, that eventually the authorship of periodical contributions will be as well known as that of other published writings.

To persons who have given but little reflection to the subject, there are few things which appear simpler than the compilation of a Catalogue or an Index;

while those who have had experience in such labor well know that the undertaking is full of difficulties. If the preparation of this work had been delayed until a plan had been fixed upon that reconciled all objections, it would never have been commenced; or, if the labor had been continued until the work was satisfactory to myself, it would never have been presented to the public. My endeavor was to bring the contents of some fifteen hundred volumes into as narrow a space as possible. The ordinary plan of indexing periodicals was, under the circumstances, wholly impracticable. The eight published Indexes of the Edinburgh and Quarterly — each with an independent alphabetical series — cover a field of only one hundred and sixty volumes. An extended Index on this plan would form a library of itself; and such minuteness of reference is oftener a vexation than an aid to the general reader. My practice has been to ignore entirely all previous Indexes and Tables of Contents; and, after an inspection of the article, and, if necessary, its perusal, to refer to it by that title under which I supposed the reader would be most likely to look for it.

Several valuable periodicals have not been included, for the reason that they could not be procured, or for other causes which it is needless to specify. In a future edition, if called for, the contents of these series, with other improvements, will be incorporated.

The discrepancy between the paging of Scott's New York reprints, and the original editions of the Edinburgh, Quarterly, Foreign Quarterly, Westminster, and North British Reviews, is a source of great annoyance; one page of the former edition comprising nearly two pages of the latter. In the former Index I used the paging of the reprints, as the original editions were not accessible. I afterwards undertook to make the references correspond to the English editions, but have proceeded no farther than to alter the paging of the Westminster and Foreign Quarterly. The *volumes*, however, of the English and the New York editions correspond; and whichever is used, the article can be found by turning to the table of contents attached to each volume.

I had hoped to complete for this edition — what I have long had in view, and in the collection of materials for which I have made some progress — an historical account of the several leading periodicals; comprising their origin, their editors, their prominent contributors, the peculiar views in literature, politics, and

religion they have advocated, and such other facts as illustrate their rise, progress, and influence. The fulfilment of this plan is, for the present, reluctantly deferred; the labor of accomplishing it satisfactorily having greatly exceeded my expectations.

My chief solicitude has been, that this work should appear with as few inaccuracies as possible. Yet, notwithstanding my endeavors, several errors and omissions have been detected since it passed through the press; and doubtless others have escaped notice. I feel confident that its mistakes and deficiencies will be charitably considered by those who are most conversant with such labor; and that whatever merit it has will be appreciated by the student who has occasion to recur to the rich field of periodical literature.

W. F. P.

Boston, October, 1858.
